

Hi! I'm Guide Panda. Let's get your wallet ready!

You don't need a Chinese bank account. Just bind your home country's Visa or Mastercard directly to Alipay or WeChat.

你好！我是向导熊猫。不需要中国银行卡，直接绑定海外信用卡即可。

1

Download

Get Alipay/WeChat and register with your foreign phone number.

2

Verify ID

Find "Real-Name Verification" and use your Passport.

3

Bind Card

Add your Visa, Mastercard, JCB, or Discover card.

4

Ready!

You can now scan QR codes online or in local shops.

Two ways to pay like a local!

Whether buying our SaaS software online or getting a coffee, here is how the QR magic works.

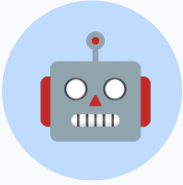

主要分为“你扫商家”和“商家扫你”两种模式。

Method A: You Scan (Scan / 扫一扫)

For websites or printed QR codes. Open your App, tap "Scan", point your camera, and confirm.

Method B: They Scan (Pay / 收付款)

For offline shops. Tap "Pay" to show your barcode/QR code. Let the cashier scan it.

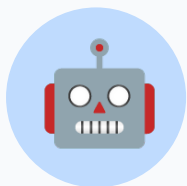

Greetings. I am Professor AI. Let's look under the hood.

Curious how our website knows you paid? We use a Cross-border API framework with automated Webhooks.

我是AI教授。我们的平台采用跨境支付API与自动化Webhook回调。

- | [01] **ORDER_INIT:** You select a plan. Our SaaS server generates a Trade_ID.
- | [02] **API_CALL:** We ping the Cross-border API requesting a gateway.
- | [03] **QR_GEN:** The API returns a secure URL rendered as a QR code.
- | [04] **WEBHOOK:** After payment, the Gateway sends a secure POST request to us.
- | [05] **PROVISION:** We verify the RSA signature and instantly unlock your features.

Fees & Limits?

Transactions under 200 RMB have 0% extra fee! Over 200 RMB incurs a ~3% platform fee.

Bank Blocks?

If payment fails, your home bank likely blocked it. Call them to authorize "Cross-border" transactions.

FAQ

Q: Currency Exchange?

A: Settled in your local currency based on real-time exchange rates.

Q: Need a Chinese phone number?

A: No! International numbers work perfectly for registration.
